

## **Federal R&D Funding, by Budget Function: Fiscal Years 2013–15**

Detailed Statistical Tables | NSF 15-306 | November 2014

Mark Boroush,  
Project Officer  
Research and Development Statistics Program  
(703) 292-8726

### **General Notes**

---

Budget authority is the primary source of legal authorization to enter into obligations that will result in outlays. It is most commonly granted in the form of appropriations by the congressional committees assigned to determine the budget for each function, such as defense, health, space, and energy. This report contains data on the budget authority provided to U.S. federal agencies to fund the research and development and R&D plant components of their programs in FYs 2013–15. FY 2013 data are agencies' actual budget authority. FY 2014 data are estimates. FY 2015 data are the funding levels proposed by the President's budget.

The data tables in this report are a statistical supplement to the recent InfoBrief authored by the National Center for Science and Engineering Statistics (NCSES) and discusses the main features of this new R&D budget authority data (<http://www.nsf.gov/statistics/2015/nsf15308/>).

## Data Tables

---

Table **Budget authority for R&D and R&D plant: FYs 2013–15**

- 1 totals and by budget function
- 2 percent distribution, by budget functions
- 3 R&D and R&D plant as percentage of overall federal budget authority
- 4 basic research, by budget function

**Agency and program detail, by budget function: FYs 2013–15**

National defense (050)

- 5 R&D and R&D plant
- 6 obligational authority for DOD research, development, test, and evaluation

International affairs (150)

- 7 R&D and R&D plant
- General science and basic research (251)

- 8 R&D and R&D plant
- Space flight, research, and supporting activities (252)

- 9 R&D and R&D plant

Energy (270)

- 10 R&D and R&D plant
- Natural resources and environment (300)

- 11 R&D and R&D plant

Agriculture (350)

- 12 R&D and R&D plant
- Commerce and housing credit (370)

- 13 R&D and R&D plant

Transportation (400)

- 14 R&D and R&D plant
- Community and regional development (450)

- 15 R&D and R&D plant
- Education, training, employment, and social services (500)

- 16 R&D and R&D plant

Health (550)

- 17 R&D and R&D plant

National Institutes of Health

18 R&D and R&D plant

Medicare (570)

19 R&D and R&D plant

Income security (600)

20 R&D and R&D plant

Veterans benefits and services (700)

21 R&D and R&D plant

Administration of justice (750)

22 R&D and R&D plant

**History of budget authority for R&D and R&D plant: FYs 1955–2015**

23 total and basic research, by budget function

24 total, national defense, and civilian functions

TABLE 1. Federal budget authority for R&D and R&D plant, by budget function, ordered by FY 2013 R&D and R&D plant total: FYs 2013–15

(Millions of dollars)

Budget function	2013 actual	2014 preliminary	2015 proposed	2013–14 (% change)	2014–15 (% change)
R&D and R&D plant	132,477	135,665	136,457	2.4	0.6
National defense	70,781	70,724	70,753	-0.1	*
Health	30,200	31,196	31,491	3.3	0.9
Space flight, research, and supporting activities	10,476	11,015	11,124	5.1	1.0

TABLE 1. Federal budget authority for R&D and R&D plant, by budget function, ordered by FY 2013 R&D and R&D plant total: FYs 2013–15

(Millions of dollars)

Budget function	2013 actual	2014 preliminary	2015 proposed	2013–14 (% change)	2014–15 (% change)
Medicare	0	0	0	-	-
Community and regional development	0	0	0	-	-
Income security	0	0	0	-	-

\* = value less than 0.05%.

NOTES: Detail may not add to total because of rounding. Percentage change calculated on unrounded data. In contrast to the previous edition of this report, there is no budget authority for R&D reported for the Government (800) category in the fiscal years covered by this report. Accordingly, this category is not included in the above table this year.

The President's budget for FY 2015 also proposed an additional \$5.3 billion for R&D and R&D plant as part of the Opportunity, Growth, and Security Initiative. There is, however, insufficient information to break down this extra package by budget function, and this spending is not included above.

SOURCES: Agencies' submissions to the Office of Management and Budget per MAX Schedule C, agencies' budget justification documents, and supplemental data obtained from agencies' budget offices.

TABLE 2. Distribution of federal budget authority for R&D and R&D plant, by budget function: FYs 2013–15  
(Percent distribution)

Budget function	2013 actual	2014 preliminary	2015 proposed
R&D and R&D plant	100.0	100.0	100.0
National defense	53.4	52.1	51.9
Health	22.8	23.0	23.1
Space flight, research, and supporting activities	7.9	8.1	8.2
General science and basic research	7.3	7.5	7.5
Energy	1.7	1.8	2.0

TABLE 2. Distribution of federal budget authority for R&D and R&D plant, by budget function: FYs 2013–15  
(Percent distribution)

Budget function	2013 actual	2014 preliminary	2015 proposed
Medicare	*	*	*
Community and regional development	*	*	*
Income security	*	*	*

\* = value less than 0.05%.

NOTES: Detail may not add to total because of rounding. Budget functions are ordered as under the table 1 stub entry for "R&D and R&D plant." In contrast to the previous edition of this report, there is no budget authority for R&D reported for the Government (800) category in the fiscal years covered by this report. Accordingly, this category is not included in the above table this year.

The President's budget for FY 2015 also proposed an additional \$5.3 billion for R&D and R&D plant as part of the Opportunity, Growth, and Security Initiative. There is, however, insufficient information to break down this extra package by budget function, and this spending is not included above.

SOURCES: Agencies' submissions to the Office of Management and Budget per MAX Schedule C, agencies' budget justification documents, and supplemental data obtained from agencies' budget offices.

TABLE 3. Federal budget authority for R&D and R&D plant as percentage of total budget authority, by budget function: FYs 2013–15

Budget function	2013 actual	2014 preliminary	2015 proposed
All functions conducting R&D	5.3	5.2	4.8
National defense	11.6	11.5	11.1
Health	8.9	7.0	6.0
Space flight, research, and supporting activities	64.1	64.5	65.8
General science and basic research	82.8	83.2	82.9
Energy	27.1	28.6	36.8
Natural resources and environment	5.3	6.4	6.6
Agriculture	6.6	8.4	12.8
Transportation	1.4	1.6	1.3
Veterans benefits and services	0.9	0.8	0.7
Commerce and housing credit <sup>a</sup>	na	na	na
Administration of justice	1.4	2.0	1.7
Education, training, employment, and social services	0.8	0.6	0.5
International affairs	0.9	0.7	0.7
Medicare	*	*	*
Community and regional development	0.1	0.4	0.2
Income security	*	*	*

\* = value less than 0.05%; na = not applicable.

<sup>a</sup> Total budget authority in the Commerce and housing credit function is a negative number (i.e., less than zero) each year, primarily due to large offsetting collections and receipts leading to negative balances in the subfunctions for federal mortgage and credit programs and government-sponsored enterprise (e.g., Fannie Mae or Freddie Mac) purchase programs. This makes this function's R&D and R&D plant as percentages of total budget authority difficult to interpret. For perspective, R&D and R&D plant as a share of discretionary authority excluding these negative subfunctions is 20.3% for FY 2013, 23.7% for FY 2014, and 21.3% for FY 2015.

NOTES: Total budget authority includes discretionary and mandatory budget authority, less offsets. Budget functions are ordered as under the table 1 stub entry for "R&D and R&D plant." In contrast to the previous edition of this report, there is no budget authority for R&D reported for the Government (800) category in the fiscal years covered by this report. Accordingly, this category is not included in the above table this year.

The President's budget for FY 2015 also proposed an additional \$5.3 billion for R&D and R&D plant as part of the Opportunity, Growth, and Security Initiative. There is, however, insufficient information to break down this extra package by budget function, and this spending is not included above.

SOURCES: Agencies' submissions to the Office of Management and Budget (OMB) per MAX Schedule C, agencies' budget justification documents, supplemental data obtained from agencies' budget offices, and Executive Office of the President, OMB, *Budget of the United States Government, Fiscal Year 2015*, U.S. Government Printing Office (2014).

TABLE 4. Federal budget authority for basic research, by budget function: FYs 2013–15

Budget function	2013 actual	2014 preliminary	2015 proposed	2013–14	2014–15
	Millions of dollars			% change

	Defense agencies	4,538	4,336	4,072	-4.5	-6.1
	Department of the Air Force	14,257	14,799	15,718	3.8	6.2
	Department of the Army	1,306	1,044	1,346	-20.1	29.0
	Department of the Navy	3,749	3,445	3,321	-8.1	-3.6
	Adjustment for RDT&E budget authority <sup>b</sup>	-981	-160	0	na	na

na = not applicable.

DOD = Department of Defense; RDT&E = research, development, test, and evaluation.

<sup>a</sup> RDT&E budget activity codes are broad categories reflecting different types of RDT&E efforts, as specified in DOD Financial Management Regulation.

<sup>b</sup> Detailed budget information on DOD RDT&E activities is available only in total obligational authority (TOA), which is the sum of new budget authority, unobligated budget authority from previous years, and other authorized credits. The adjustment converts TOA to budget authority by subtracting unobligated budget from authority from previous years and other authorized credits from TOA.

NOTES: Detail may not add to total because of rounding. Percentage change is calculated based on unrounded data. The data do not include the extra funding for FY 2015 proposed as part of the President's Opportunity, Growth, and Security Initiative.

SOURCES: Agencies' submissions to the Office of Management and Budget (OMB) per MAX Schedule C, agencies' budget justification documents, supplemental data obtained from agencies' budget offices, and Executive Office of the President, OMB, Budget of the United States Government, Fiscal Year 2015, U.S. Government Printing Office (2014).

\* = amount less than \$500,000. na = not applicable. NA = not available; data were not collected for all budget functions in all years.

ARRA = American Recovery and Reinvestment Act of 2009.

<sup>a</sup> Other includes amounts not explicitly tallied in one of the separately identified categories.

<sup>b</sup> Data on budget authority for R&D plant were not tabulated before FY 2000.

<sup>c</sup> Total for FY 2009 is the sum of non-ARRA and ARRA funds.

<sup>d</sup> Data for 1955–77 are obligations; data for 1978–2015 are budget authority.

<sup>e</sup> Not all basic research funded by the federal government falls into the General science and basic research (251) category. Federal funding for basic research arises in other functional categories—such as National defense or Health—and is included in the category funding totals there.

NOTES: Detail may not add to total because of rounding. In FY 2007, the Department of Homeland Security (DHS) changed its R&D portfolio to reclassify funding in National defense and most Administration of justice as General science and basic research; in FY 2013, this was reclassified back as Administration of justice. In FY 2004, DHS changed its R&D portfolio to reclassify funding in General science and basic research and in Agriculture as Administration of justice. In FY 2000, the National Aeronautics and Space Administration (NASA) transferred funding for the International Space Station program from R&D to R&D plant; the change is reflected in the budget authority for Space flight, research, and supporting activities. In both FY 2009 and FY 2012, NASA revised the classification of its R&D and non-R&D funding. In FY 2000, the National Institutes of Health in the Department of Health and Human Services classified all of its previous development activities as basic research or applied research, with resulting increase in Health basic research. In FY 1998, many Department of Energy programs were reclassified from Energy to General science and basic research. In FY 1998, the Department of Veterans Affairs began reporting medical care support funds as a part of its total research budgetary resources; change is reflected in budget authority for Veteran benefits and services.

The President's budget for FY 2015 also proposed an additional \$5.3 billion for R&D and R&D plant as part of the Opportunity, Growth, and Security Initiative. There is, however, insufficient information to break down this extra package by budget function, and this spending is not included above.

SOURCES: Data from FYs 1955–94 are from agencies' submissions to the Office of Management and Budget (OMB), circular no. A-11, exhibit 44A, "Research and development activities," and from supplemental data obtained from agencies' budget offices. Data from FYs 1995–2015 are from agencies' submissions to OMB per MAX Schedule C, budget justification documents, and supplemental data obtained from agencies' budget offices.

2014 preliminary	133,103	70,338	62,766	100.0	52.8	47.2
2015 proposed	134,005	70,319	63,686	100.0	52.5	47.5

ARRA = American Recovery and Reinvestment Act of 2009.

<sup>a</sup> For total FY 2009, sum FY 2009 non-ARRA and FY 2009 ARRA funds.

NOTES: The National defense function includes Department of Defense military activities and Department of Energy atomic energy defense programs; some years also include defense-related R&D in the Department of Homeland Security and the Department of Justice. Civilian functions include all other federally funded R&D activities.

The President's budget for FY 2015 also proposed an additional \$5.3 billion for R&D and R&D plant as part of the Opportunity, Growth, and Security Initiative. There is, however, insufficient information to break down this extra package by budget function, and this spending is not included above.

SOURCES: Agencies' submissions to the Office of Management and Budget per MAX Schedule C, agencies' budget justification documents, and supplemental data obtained from agencies' budget offices.

## Appendix. Technical Notes

---

### Overview

All activities covered by the federal budget, including R&D, are classified into 20 broad functional categories (see "Budget Functions and Classifying R&D"). Currently, R&D activities are present in 15 of the 20 categories.

The data tables in this report provide R&D budget authority detail by agency and major programs for each of the categories in which R&D is present. Several concluding tables also include budget authority figures for R&D in FY 2012 and earlier years.

The figures for FY 2013 are the actual budget authority received by federal agencies for R&D that year. Those for FY 2014 are preliminary, reflecting agency reporting and final appropriations outcomes. The FY 2015 figures are the administration's proposed funding levels, based chiefly on the President's *Budget of the United States Government, Fiscal Year 2015*, but they also reflect agency documents and other Office of Management and Budget (OMB) data available through July 2014. The proposed figures for FY 2015 are the basis for subsequent legislative activity in the Congress to enact the federal government's annual budget. (Note: The President's FY 2015 budget proposal includes a base funding level for R&D and R&D plant of \$136.5 billion. An additional \$5.3 billion for R&D and R&D plant is proposed as part of the FY 2015 budget's Opportunity, Growth, and Security Initiative [OGSI]. At the time of this report, however, information was not sufficient to break down this incremental OGSI funding by budget function. The data in this report's statistical tables cover only the base funding.)

Data reported here as "preliminary" or "proposed" will be revised in subsequent editions of this report to reflect the later congressional appropriation actions and agency program-funding decisions.

### Definitions

#### ***Research, Development, and R&D Plant***

In this report, R&D refers to basic research, applied research, and development activities in science and engineering.

*Research* is systematic study directed toward fuller scientific knowledge or understanding of the subject studied. Research is classified as either basic or applied, according to the objective of the sponsoring agency:

*Basic research* is systematic study directed toward fuller knowledge or understanding of the fundamental aspects of phenomena and of observable facts without specific applications toward processes or products in mind.

*Applied research* is systematic study to gain knowledge or understanding necessary to determine the means by which a recognized and specific need may be met.

*Development* is systematic application of knowledge or understanding directed toward the production of useful materials, devices, and systems or methods, including design, development, and improvement of prototypes and new processes to meet specific requirements. It excludes quality control, routine product testing, and production.

Funds for conducting R&D include those for personnel, program supervision, and administrative support directly associated with R&D activities. Expendable or movable equipment needed to conduct R&D—for example, microscopes or spectrometers—is also included.

*R&D plant* includes such R&D facilities as reactors, wind tunnels, or particle accelerators or the construction, repair, or alteration of such facilities.

The data exclude all non-R&D activities performed within budget functions that conduct R&D and all functions in which no R&D is conducted.

### ***Budget Authority, Obligations, and Outlays***

The federal R&D funding data presented here (with only a few noted exceptions) are provided in terms of budget authority. Budget authority is used because it is the initial budget stage for congressional action on the President's proposed budget. Budget authority imposes a ceiling on obligations and outlays; obligations and outlays flow from budget authority.

*Budget authority* is the primary source of legal authorization to enter into obligations that will result in outlays. Budget authority is most commonly granted in the form of appropriations by the congressional committees assigned to determine the budget for each function.

*Obligations* represent the amounts for orders placed, contracts awarded, services received, and similar transactions during a given period, regardless of when the funds were appropriated and when the future payment of money is required.

*Outlays* represent the amounts for checks issued and cash payments made during a given period, regardless of when the funds were appropriated or obligated.

### **Budget Functions and Classifying R&D**

The federal budget total is the sum of funding across the 20 broad functional categories. These categories are National defense (function 050); International affairs (150); General science, space, and technology (250); Energy (270); Natural resources and environment (300); Agriculture (350); Commerce and housing credit (370); Transportation (400); Community and regional development (450); Education, training, employment, and social services (500); Health (550); Medicare (570); Income security (600); Social security (650); Veterans benefits and services (700); Administration of justice (750); General government (800); Net interest (900); Allowances (920); and Undistributed offsetting receipts (950).

R&D has never been reported in 4 of these 20 functions: Social security (650), Net interest (900), Allowances (920), and Undistributed offsetting receipts (950). As such, data on these categories are not present in this report, except indirectly, where R&D is described as a proportion of total federal budget authority.

Small amounts of R&D had been reported in the General government (800) category up through FY 2002 but turned to zero thereafter. A small amount of R&D was again reported in FY 2012 but returned to zero throughout the FY 2013–15 period covered in this report.

To better highlight R&D areas of high interest, the data tables in this report split the General science, space, and technology (250) category into its two subfunctions: General science and basic research (251) and Space flight, research, and supporting activities (252).

Overall, this report's data tables separately cover 16 functional categories: 14 at the broad functional category level and 2 at the subcategory level.

Each specific R&D activity is assigned to only one functional category—consistent with the official codes used in budget documents, even though the R&D activity may address the objectives of several

functions. For example, all R&D activities sponsored by the Department of Defense (except for those of the U.S. Army Corps of Engineers) are classified as National defense (050), even though some of these have secondary objectives, such as space flight and health. Nonetheless, an agency's overall R&D effort can involve multiple activities spread across several functional categories, which means that a functional category can show the presence of several agencies. For example, the federal funding for the past national project to map the human genome, which involved the activities of several agencies and a number of R&D programs, appeared in both the Health (550) and General science and basic research (251) categories.

Finally, not all federally sponsored basic research is categorized in the General science and basic research (251) subfunction. Some basic research is included in many of the other functional categories. Also, not all of the R&D included in the 251 subfunction is basic research—some is applied research.

Table A-1 maps the mix of agency funding of R&D activities in FYs 2013–15 across the budget function categories.

## **Data Sources**

The federal budget does not include a separately identified R&D account. Furthermore, most appropriations for R&D are not directly labeled as such (except in certain program areas, such as defense, energy, health, and environment). As such, most funds for R&D are not line items in agency budget submissions but are included instead as part of general program funding.

To provide information on federal R&D funding, OMB requires all agencies with R&D funding levels greater than \$10 million annually to submit data on their R&D programs as part of their annual budget submissions. Such agencies are requested to provide data on their funding levels for basic research, applied research, development, R&D facilities, and capital equipment for R&D, in accordance with OMB's Circular No. A-11, MAX Schedule C, "Research and Development Activities."

The data in the present report were collected between March and July 2014 and represent the agencies' best estimates of actual and proposed federal funding for R&D over the FY 2013–15 period. The data are based primarily on information provided to OMB by 26 agencies and account for an estimated 99% of all federally sponsored R&D activities. The data reflect R&D funding information that became available from individual agencies after the administration's budget was prepared and released after the March 2014 publication of the *Budget of the United States Government, Fiscal Year 2015*. This later information consists of budget justification documents that agencies submit to the Congress and supplemental, program-specific information obtained from agency budget and program staff, collected through July 2014. Accordingly, the budget numbers reported for individual activities, programs, or agencies may differ somewhat from those published in the President's budget or in agency budget documents.
